**Subject:** Detection of 1,4-dioxane in Stonetown  
**Date:** Friday, August 14, 2020 10:27:00 AM

---

Hi Scott – I was contacted earlier this week by a prospective purchaser of a property in Stonetown regarding the detection of 1,4-dioxane in a well sample from this property. 1,4-dioxane was detected at a concentration below the 0.4 ug/L NJGWQS in this sample. Are you aware of any other detections of 1,4-dioxane in the Stonetown section of Ringwood? Given that this property is at least 4 miles from the Ringwood site, and located on the west side of the Wanaque Reservoir, impact from the Site is very unlikely. I have recommended to the prospective purchaser that the well be resampled to confirm the presence of 1,4-dioxane.
